What is actually in a FILLER?

1 Hyaluronic Acid

Hyaluronic acid is a natural complex sugar found in our body. It is biodegradable and completely biocompatible with human hyaluronic acid. Juvederm Ultra, Juvederm Ultra Plus, Restylane, and Perlane are hyaluronic acid dermal fillers.

2 Calcium Hydroxylapatite

Radiesse is biosynthetically made up of calcium hydroxylapatite suspended in a carboxymethylcellulose gel. Calcium hydroxylapatite is a normal constituent of bone. It stimulates your skin to produce *new collagen*.

Imagine, getting up in the morning and getting ready for work without having to spend time applying make-up. Imagine...always looking your best, no matter what! The application of **permanent make-up** (micropigmentation) is a unique combination of artistic ability and technical skill. To create the most natural results with technique, placement, and color with good judgement is paramount. Call for your consultation at (480) 951-0539.
